

Thursday 7th May

Today we are solving number problems within 20.

Watch lesson 4 video and have a go at the questions. Use practical objects to help you solve the problems.

<https://whiterosemaths.com/homelearning/year-1/>

Can you make your own number-line to 20 to help you? Think carefully where the jumps go if you are adding – above or below the numbers?

(Clue for parents / carers – When adding the jumps go above the numbers, when subtracting the jumps go below the numbers!)

Can you write some word problems of your own? Use your toys to help you. Ask your grown-ups if they can solve your questions – make sure you know the answers first!
